

To facilitate the handling and movement through the various stages of the processing of materials, regardless of the size of the pieces, **TIEGE** has developed carrier systems that allow clients to manage increasing productivity and quality control of their product.

We highlight the following:

- Monorail Carrier - simple track
- Birrail Carrier - double track
- Automatic Warehouses
- Bridge crane

It can be manual, automatic or semi-automatic. Our solutions will always meet the needs and objectives of each client.
